TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python
- **Frontend:** Next.js, React, Tailwind CSS, State Management (Redux/Context API).
- **Backend:** Node.js, Express.js, FastAPI, RESTful APIs, Webhooks.
- **Databases & Storage:** MongoDB (NoSQL), PostgreSQL, Cloudinary (Asset Management).
- **Tools & DevOps:** Git/GitHub, Postman, Vercel/Render Deployment, CI/CD.

TECHNICAL EXPERIENCE

Full-Stack Developer | Distributed Team (Volunteering Platform), Feb, 2026 – Mar, 2026

- **Designed** a personalized volunteering dashboard using **Next.js** and **FastAPI**, implementing a data-driven filtering system to match volunteers with relevant opportunities.
- **Collaborated** within a team of 7 developers and designers, utilizing a **ticketing system** to manage features from ideation to deployment.
- **Developed** a dual-sided platform that allowed organizations to track volunteer progress and manage recruitment workflows efficiently.
- **Engineered** a tailored user experience by building a recommendation engine that excluded irrelevant data, increasing UI clarity and user engagement.
- **Facilitated** a smooth hand-off to the administrative and stakeholder teams, ensuring the codebase was documented and ready for enterprise-level scaling.

Lead Developer | Kazafi (E-commerce Platform) | Feb 2025 – Feb 2026

- **Engineered** a full-stack e-commerce engine from conception to production, featuring a secure checkout pipeline, automated receipt generation, and a comprehensive user dashboard.
- **Integrated Paystack API** for secure payment processing, implementing complex **webhook handlers** to manage asynchronous order status updates and error redirection.
- **Developed an Analytics Suite** for the administrative backend, providing real-time insights into revenue, customer behavior, and order fulfillment metrics.

- **Implemented Secure Authentication** and role-based access control (RBAC) to separate customer views from sensitive administrative settings.
- **Optimized for Production:** Managed the end-to-end hosting and deployment process, and responsive performance across all devices.

CERTIFICATIONS & TRAINING

- **PCEP™ – Certified Entry-Level Python Programmer | *Python Institute***
 - Validated foundational expertise in Python syntax, data structures, and procedural programming logic.
- **AI Augmented Professional Development | *ALX Africa***
 - Mastered AI-driven productivity tools (ChatGPT, Claude, etc.) for rapid prototyping, documentation, and workflow optimization in a digital-first environment.
 - Developed "Meta-Skills" in Asynchronous Communication and Remote Collaboration, specifically designed for global distributed teams.

EDUCATION

Bachelor of Science in Industrial & Production Engineering | *Federal University of Technology, Akure*

Final Year Project: Design Optimization of Industrial Processing Equipment

- **Systems Optimization:** Engineered structural modifications to resolve performance bottlenecks, improving system throughput and processing speed.
- **3D Modeling & Simulation:** Utilized FreeCAD for reverse engineering and stress-point analysis, applying simulation techniques to ensure component durability under high load.
- **Data-Driven Analysis:** Leveraged Microsoft Excel for statistical data analysis to validate efficiency gains and refine mechanical workflows.
- **Scalable Methodology:** Developed a modular framework for equipment analysis that served as a blueprint for future industrial research and iterative improvements.
